Power Powerbar Set 2x 5 Schuko - 923

The under-desk power set provides an efficient and safe power supply for two workstations. The set consists of two 5-way power strips with integrated GST18i3 input and output, making it easy to daisy-chain or connect power products on the desktop. The power strips are made of fire-retardant polycarbonate and aluminium and have internal overload protection. Thanks to the optional mounting brackets, the units can be mounted directly under the desktop, in cable ducts or on furniture panels. With 10 Schuko sockets, this set offers enough connections for monitors, docking stations and other desktop equipment.

The starter cable (24.163 or 24.303) is sold separately to offer flexibility in installation.

- 10 Schuko sockets (2x 5-gang power strips)
- Easy installation in the cable duct for a neat and organised power supply
- Includes GST18 splitter and cabling for a fast and secure connection
- Sufficient sockets for monitors, docking stations and other workplace accessories
- Integrated GST18i3 input and output for looping through or additional connections on the desktop
- Starter cable is sold separately - 24.163 or 24.303
- To be installed under the desktop, in cable ducts or on furniture panels with the supplied mounting brackets
- Housing made of fire-retardant polycarbonate and aluminium with internal overload protection.
- CE-marked, EN 62368-1:2014+A11:2017, DIN VDE 0620-1:2016+A1:2017 and IEC 60884-1:202+A1:200+A2:2013
- WEEE-compliant and 100% tested before shipment, produced according to ISO9001
