

## 65.723 Viewprime top access clamp mount 723

The Viewprime top access clamp is perfecty suitable for most desktop thicknesses between 8 to 40 mm. Due to the very limited space it needs underneath the desktop itself, it also works great with sliding desktops and desktops with a cable tray. Another key benefit is that the clamp is tightened from the top, making it easy and fast to install. This clamp is designed specifically for the dual Viewprime plus monitor arm (65.213).

- Suitable for desktop thicknesses from 8 to 40 mm (0,31 1,57")
- Tightens from the top, easy access
- Occupies max. 6 mm of space below the desk top
- Mounting option for single Viewprime plus monitor arm 65.213
