Viewgo Pro

Monitor arms have become an essential ingredient to achieve a truly ergonomic and practical workstation. The use of ergonomic accessories like monitor arms can increase productivity up to 15%, free up valuable desk space and support clean desk policies. However, most professional, high quality monitor arms are expensive.

Viewgo Pro is here to change that

During the pandemic, material costs increased drastically. On all fronts, in almost every sector. This simply meant peoples workplace design budgets shrank. We designed a product that delivers all the functionality and benefits of high-end monitor arms, at a fraction of the cost. With no concessions on quality or longevity. Viewgo Pro ticks all these boxes and then some.

Benefits

- Increases productivity and employee wellbeing
- Helps to prevent workstation related health complaints
- Meets all ergonomic standards. ISO 9241-5 compliant
- Easy to use and maintenance-free
- Suitable for nearly every monitor
- Fast and easy installation saves time and money
- Fully modular and upgradable
